Webinar ID: 868 6232 6554

**How can our homes be more welcoming to people with disabilities?
As we age what modifications will help us stay in our homes longer?
What are some tips, both easy and not-so-easy?**

You're invited to a free webinar on the basics of creating an accessible home. Ramps, doors, bathroom-safety, kitchen-usability and other types of accommodations will be discussed. Learn from lived experience! Bring your questions and stories of your own accessibility ingenuity. We can all be more aware of these topics on the side of love!

Brief speakers include Bruce Barney (who helpfully created a new resource guide), Michael Young, Debra Nuñez & David Oaks. We'll have time for you to share your own ideas, goals, challenges and successes with each other.

We'd love to hear examples of your own home modifications & any questions.
